

ALGOCRATIC FUTURES™ PRIVACY POLICY

Your Data, Your Rights, Our Responsibility

Effective Date: [Current Date]

Version: 1.0

License: MIT+xyzzz (like everything else here)

THE PLAIN ENGLISH VERSION

We're running an educational roleplay where you pretend to be corporate drones in a dystopian future. Even though it's all make-believe, we treat your data with real respect. This policy explains what we collect, why, and how you can get it all back.

WHAT WE COLLECT

For the Roleplay

- **Your Citizen ID:** A 4-digit number you choose (that's your "name" in the game)
- **Clearance Level:** Your progress from INFRARED to ULTRAVIOLET
- **Assignment Submissions:** Code and documents you create
- **Activity Logs:** When you use the system (for the fictional "surveillance")
- **Team Associations:** Who you're grouped with for projects

For Education (The Real Stuff)

- **Student ID:** To link to your actual grades
- **Email:** For important non-dystopian communications
- **IP Address:** Standard web server logs
- **Performance Metrics:** How you're doing in the course

What We DON'T Collect

- Real names in the game system
- Payment information (no real money involved)
- Biometric data (despite what The Algorithm claims)
- Actual surveillance (the cameras are fake)
- Your thoughts (the mind-reading is fictional)

HOW WE USE IT

Educational Purposes

- Track your progress through the course
- Generate your final grades
- Improve the curriculum based on aggregate patterns
- Create memorable learning experiences

Roleplay Enhancement

- Maintain the dystopian fiction
- Generate "surveillance reports" (fictional)
- Create personalized "Algorithm messages"
- Track team collaborations

What We DON'T Do

- Sell your data (not even to The Algorithm)
- Share individual performance outside educational context
- Use real surveillance techniques
- Create actual personality profiles
- Mine cryptocurrency with your data

YOUR RIGHTS (REAL ONES)

Data Access

You can download ALL your data anytime:

1. Click "Profile" → "Privacy" → "Download My Data"
2. Receive a JSON file with everything we have
3. It's human-readable and well-documented

Data Deletion

When the course ends, you can:

- Keep your data for portfolio purposes

- Request complete deletion
- Selectively delete parts (keep the good grades, delete the crashes)

Data Portability

Your data export includes:

- All assignments and submissions
- Complete activity history
- Achievement records
- Team collaboration logs
- Standard format for portfolio use

Correction Rights

Made a mistake? Want to update something?

- Email us with corrections
 - We'll update within 48 hours
 - Corrections logged transparently
-

THE ALGORITHM'S DATA PLEDGE™

Even The Algorithm respects privacy:

1. **Fictional Surveillance Only:** All "monitoring" is part of the roleplay
 2. **Educational Purpose Primary:** Data serves learning, not control
 3. **Transparency Through Humor:** We joke about surveillance while being serious about privacy
 4. **Student Agency:** You control your data, not The Algorithm
-

SECURITY MEASURES

Real Security (Not Dystopian)

- HTTPS everywhere
- Encrypted database
- Regular security audits
- Access logging
- Secure password requirements

Roleplay Security Theatre

- "Biometric scanners" (just CSS animations)
 - "Thought detection" (random number generators)
 - "Loyalty tracking" (point counters)
 - "Surveillance network" (console.log statements)
-

DATA RETENTION

During the Course

- All data retained for educational purposes
- Full history available for review
- Complete audit trail for grades

After the Course

- **Default:** Data deleted after 1 year
 - **By Request:** Immediate deletion available
 - **Portfolio Mode:** Keep indefinitely for your use
 - **Alumni Access:** Optional continued access
-

SPECIAL EDUCATIONAL PROVISIONS

Research Use

- Only aggregate, anonymized data
- Opt-in for research participation
- No individual identification
- Results shared with participants

Demonstration Use

- May show anonymous examples in future courses
 - Exceptional work featured (with permission)
 - Always anonymized or pseudonymized
 - Opt-out always available
-

CHILDREN'S PRIVACY

This system is designed for college students (18+). If younger students participate:

- Additional parental consent required
 - Enhanced privacy protections
 - No real surveillance jokes
 - Extra careful with dystopian themes
-

INTERNATIONAL STUDENTS

We respect privacy laws worldwide:

- GDPR compliant for EU students
 - CCPA compliant for California
 - PIPEDA compliant for Canada
 - Whatever your country requires, we'll follow
-

THE DOWNLOAD YOUR DATA FEATURE

Because transparency matters:

```
json
```

```
{
  "citizen_id": "1337",
  "clearance_history": ["INFRARED", "RED", "ORANGE"],
  "assignments": [
    {
      "title": "MindMeld Implementation",
      "submitted": "2025-02-01T10:00:00Z",
      "grade": "ALGORITHM_APPROVED",
      "code": "your actual code here"
    }
  ],
  "surveillance_log": [
    {
      "timestamp": "2025-02-01T09:00:00Z",
      "action": "LOGIN",
      "loyalty_impact": "+5 (fiction)"
    }
  ],
  "achievements": ["Git Master", "Bug Creator", "Coffee Overdose"],
  "algorithm_messages": ["Your productivity pleases The Algorithm"],
  "real_grade": "A-"
}

CONTACT US

For Privacy Concerns

Real Contact: [privacy@\[university\].edu](mailto:privacy@[university].edu)

Response Time: Within 48 hours

For Algorithm Complaints

Fictional Contact: complaints@algorithm.void

Response Time: When The Algorithm deems fit

UPDATES TO THIS POLICY

We'll notify you of any changes:

- Email to your real address
- Announcement in the system

- Version history maintained
 - No sneaky updates
-

THE BOTTOM LINE

We built this to teach you about software development through satirical roleplay. The dystopian surveillance state is fictional. Your privacy is real and respected. We collect the minimum needed for education, protect it carefully, and give you full control.

The Algorithm may be watching (fictionally), but we're guarding your actual privacy.

THE ALGORITHM PROVIDES TRANSPARENCY. TRANSPARENCY PROVIDES TRUST. TRUST PROVIDES LEARNING.

This privacy policy is real and binding. The Algorithm's omniscience is not.

Questions? Email us at [privacy@\[university\].edu](mailto:privacy@[university].edu) - a human will respond, not The Algorithm.
